

Press release

## The SCHAKO Group grows and gains further competences

The company Rentschler REVEN GmbH ([www.reven.de](http://www.reven.de)) belongs with immediate effect as a further innovative company to the SCHAKO Group. With company REVEN the SCHAKO Group could gain the technology leader (X-CYCLONE® technology) in the field of air cleaning (separation of oils, emulsions, water vapor, process exhaust gases and fine dusts). Typical fields of application for air cleaning are: industrial kitchens in hotels and canteens, food processing, production and machining processes in the field of mechanical engineering, drilling processes on oil platforms, UV paint shops, production processes with release of softener vapors in injection moulding systems.

The company Rentschler REVEN GmbH was founded in 1905 and is known as well as recognized as the specialist for high quality air cleaners by architects, planners, plant manufacturers and end customers.

With the product line compact air cleaners the company REVEN is also excellently positioned in the industrial environment, for example in the cleaning of exhaust air from processing machines, coating plants or food-processing lines. (Separation of water-based aerosols such as cooling lubricants or spray mist).

With the acquisition of REVEN the SCHAKO Group excellently extends the competences and the product portfolio in the ventilation technology of buildings and thereby consistently continues its strategy.

The SCHAKO Group (SCHAKO, Schneider Elektronik GmbH, Novenco Building & Industry, Sirocco Luft- und Umwelttechnik GmbH, Rentschler REVEN GmbH) is a leading group of companies in the field of ventilation, climate, fire protection and smoke extraction solutions for buildings, tunnels and industrial plants.
